Attention for Japanese Students

SDG professional course の留学生用に設置された科目です。
受講生は、毎回、英語で発表し、英語で質疑に応答します。
英語で発表資料を作成して発表してもらいます。
不自由なく英会話できることが受講の前提です。

Purpose of this course

To examine innovation and creativity from a “GIGAKU” viewpoint.

The word “GIGAKU” is a term originally created in Nagaoka University of Technology to represent an idea of applying “Science of Technologies” for mankind.

To represent an idea, **it is necessary to have a presentation skill.**

Main goal of this course

To improve your presentation skill in English!

More precisely, I would like you to possess an ability to clearly present your contributions on research at international conferences.

To achieve the goal...

1) Individual presentation practices and summarizations

Individually prepare presentations and summarize your practices via feedbacks

2) Group presentation practices and summarizations

Prepare presentations and summarize the practices via feedbacks by groups

What is expected...

I would ask you, within this class, to

- 1) Practice your presentations;
- 2) Get feedbacks on your presentations; and
- 3) Efficiently use the feedbacks for future presentations.

Evaluation

- Individual Presentation: 30 points (15 points each x 2)
- Group Work: 30 points (15 points each x 2)
- Active Participation
(comments and questions during the lecture) : 20 points
- Feedback Report: 20 points (5 points each x 4)

Students who get 60 points or more will pass the course.

NOTE: It is very important to submit feedback reports before the deadline!

Today's schedule

1) To introduce ourselves to each other (2-3 minutes each)

Please include

- your name and nationality
- your research major
- what you expect from this course

2) Free discussion on “GIGAKU”

-Let's share better ideas/images on “GIGAKU”.

What is “GIGAKU”?

The word “GIGAKU” is a term originally created in Nagaoka University of Technology to represent an idea of applying “Science of Technologies” for mankind.

Question 1:

What are “Science of Technologies”?

Question 2:

What kind of ideas would be applications of “Science of Technologies” for mankind?
